

Math Placement Assessment Proctoring FAQ

Students are required to take the ALEKS Math Placement Assessment in a proctored setting. Students are still able to take the assessments online and at home, but will be proctored virtually. Students taking a proctored assessment will receive information regarding the process in their Next Steps.

Why use proctoring?

Success at Temple University does not follow one particular pathway, as our students are varied and diverse in their backgrounds. For incoming students, it is important that they start on the right track, beginning with determining the appropriate courses for their first semester. Research shows that proctored math placement assessments are more likely to place students into math courses in which students are more likely to succeed.

What is remote proctoring?

Remote proctoring is a method of online proctoring that allows students to take your exam from the comfort of your home or location of choice. Students are remotely proctored using Respondus Monitor, a completely automated remote proctoring vendor. There is no human proctor involved. Respondus Monitor walks students through the check in procedures and monitors students throughout their assessment session through audio and video.

What happens after the session is complete?

After the assessment session, a staff member reviews each video. Any instances of academic dishonesty are addressed. This may include invalidation of the placement assessment result and requirement to retake the assessment in a proctored setting.

What are the requirements to take the assessment with Respondus Monitor?

As with other placement assessments, students will need a computer to take their math placement assessment. Chromebooks are not supported by Respondus Monitor. In addition to a computer, students will need a computer camera with audio.

Students will also need to have their ID available as well as one piece of blank loose scratch paper and pencils. Students should also make sure they have adequate space to take their assessment. That includes finding a private space free from noise and distractions.

What should I do if I experience issues?

If you experience technical issues during the assessment, you can reach out to ALEKS Support directly by phone at (800)-258-2374. You can also use their email function accessible from this [link](#).

Who do I contact if I have questions about the process?

The Office of Institutional Research and Assessment at Temple University can answer any questions you have in regards to the process. You can reach the office by phone at 215-204-8611 (Monday through Friday, 8:30 AM to 5:00 PM EST) or by email at placements@temple.edu.
